PROFESSIONAL SUMMARY

Technical product builder and AI engineer focused on developing scalable, user-centric applications. Proven ability to bridge complex technical architecture with strategic product execution, leveraging generative AI, neural networks, and data-driven problem-solving to automate workflows and optimize user experiences.

EDUCATION

S.S.B.T.'s C.O.E.T.

Bachelor of Engineering in Computer Engineering

Jalgaon, MH, India

Nov 2022 – Present

EXPERIENCE

Artificial Intelligence Intern

Edunet Foundation

Nov 2022 – May 2025

Bengaluru, KA, India (Remote)

- Developed and trained a multi-layer neural network with ReLU activation to classify handwritten digits using the MNIST dataset, achieving over 98% accuracy.
- Gained practical experience in deploying scalable machine learning and deep learning models using Microsoft Azure cloud infrastructure.

Web Development Intern

Gao Tek

July 2024 – Oct 2024

USA (Remote)

- Contributed to the deployment of 9+ web projects, directly collaborating with cross-functional development teams to iterate on responsive layouts and improve overall user experience.
- Led weekly progress presentations to team managers and stakeholders, translating technical progress into actionable business updates.

PROJECTS

Enterprise Cybersecurity Threat Detection | Python, Scikit-Learn

[Link](#)

- Engineered a dual-model intrusion detection system combining a Random Forest classifier ("Sniper") and an unsupervised Isolation Forest ("Radar") to capture both known attack signatures and zero-day anomalies.
- Achieved 99.75% accuracy on historical attacks by processing live connection data, establishing topological boundaries to successfully flag novel, unclassified threats.

Predictive Maintenance AI for IoT | Python, Scikit-Learn, Flask

[Link](#)

- Developed an end-to-end predictive maintenance ML pipeline analyzing 21-sensor time-series telemetry data from the NASA CMAPSS dataset.
- Deployed a highly scalable Flask REST API to transition heavy manufacturing from reactive to predictive maintenance, utilizing a Random Forest Classifier to identify imminent engine failures within a 30-cycle window.

AI Energy Consumption Forecasting System | Scikit-Learn, Flask, Pandas

[Link](#)

- Built a Multi-Layer Perceptron (MLP) Neural Network pipeline to forecast hourly electricity demand based on simulated smart-meter time-series data.
- Solved the business problem of unpredictable energy demand by deploying a real-time forecasting API, enabling facilities to proactively optimize energy management and avoid peak usage penalties.

SKILLS

Programming: Python, MySQL, C Language, HTML, CSS, JavaScript

Core AI: Machine Learning, Deep Learning, Neural Network, Data Preprocessing, Data Analysis, Software Engineering, NLP, LLM, Computer Vision, Generative AI, Agentic AI, Prompt Engineering

Frameworks: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Matplotlib, OpenCV

LLM Tools: Hugging Face, LangChain, LangGraph, LangFuse, CrewAI, N8N

Deployment: Flask, FastAPI, Git, VS Code, Jupyter, Firebase, Azure

LEADERSHIP & EXTRACURRICULARS

MY Bharat Budget Quest | National Finalist

2026

- Advanced to the final round by articulating complex economic strategies and policy frameworks, including comprehensive proposals on fostering a global entrepreneurship hub.

Leadership Council Core Member | IIT Delhi

2026

- Contributed to the execution and coordination of a major job hunt initiative, collaborating with industry professionals to drive participant engagement.

Smart India Hackathon (SIH) Finalist & Organizer | Lead Developer

2024 & 2025

- Led a team to design a multi-model AI solution, and facilitated technical evaluation and problem-solving discussions for 50+ internal participants.

Youth Parliament Speaker | District-Level Representative

2025 & 2026

- Demonstrated advanced public speaking, debating, and strategic communication skills.

CERTIFICATIONS

AI & Cloud: Oracle Certified in OCI AI Foundations & Generative AI Professional; Google Skills Certified in Introduction & Advanced in Generative AI.

Programming & ML: IIT Bombay Certified in Python; NPTEL Certified in Introduction to Machine Learning; Gao Tek Certified in Digital Marketing.
